<https://www.videoslots.com/phive/modules/BoxHandler/html/ajaxActions.php?tag=new.cgames&func=getBySubTag&lang=en&boxid=967&action=GetBoxHtml>

2. Register page popup instead of login, when user pressed play button

1. Priority : High (Business decision)
2. Precondition: go to www.videoslots.com, without login
3. Step to reproduce: on the homepage press play button.
4. Actual result: Register popup opens instead of login.
5. Consequences: As usual human habits, many of the websites show their users to login page instead of register page if authentication is needed.
6. Screenshot
